

## GENERAL MANAGER'S REPORT

Date submitted: May 23, 2024

### **1. Community Bus**

Delivery of the new Community Bus is expected in a couple of weeks. The old Community Bus was removed from service this week due to the amount of repairs required. To bridge the gap, one of the 30-foot Vicinity buses will be used until the new one is ready for service.

### **2. Bed Bug Prevention Program**

This week there were posts on Facebook resulting in inquiries at the call centre regarding bed bugs seen on a bus. Public were assured that Metrobus has a Bed Bug Prevention Program in place where the fleet is thoroughly checked every month for bed bugs and in between, if necessary. The fleet will be thoroughly checked tomorrow morning (May 24<sup>th</sup>) before the buses go into service.
