

GENERAL MANAGER'S REPORT

Date submitted: September 11, 2024

Community Bus

A step was ordered and installed to assist customers boarding and alighting since the new bus is higher than the previous one. However, with the step installed, the bus exceeds the allowable width under provincial legislation. To address the height, the ramp will be deployed at each stop (except where the curb adequately mitigates the height) until/if/when another suitable solution is found.
